Description			
Debian bug #601021			
<p>As the subject says, bip doesn't make openssl load support for the sha-256 digest algorithm. I've fixed a similar bug in fetchmail a while ago, see Debian bug #576430 for a bit more info on the matter. Attached is a simple patch that forces openssl to load support for everything it knows :)</p> <p>Sjoerd Simons</p>
