<b>Description</b>			
In the current code <code>/usr/share/dicoweb/urls.py</code> does not allow a <code>robots.txt</code> route. So we should probably alter this route table to add it. I'd like a Django user to have a look and produce a proper patch to use a static file, in <code>/etc/dicoweb/robots.txt</code> (maybe there is a CONFDIR vairable for this), as the content for this URL.

In recent versions dicoweb adds a `robots` meta tag which allows to index the index page but not the results.
