

DuckCorp Infrastructure - Bug #463

Replace our Ancient Gallery

2015-07-12 23:18 - Marc Dequènes

Status: In Progress	Start date: 2015-07-12
Priority: High	Due date:
Assignee: Marc Dequènes	% Done: 10%
Category: Service :: Web	Estimated time: 0.00 hour
Target version:	
Patch Available:	Entity: DuckCorp
Confirmed: No	Security:
Branch:	Help Needed:
Description Gallery2 is not supported anymore, it is old and ugly, probably with security issues. It also uses old libraries, probably having security issues too, like Smarty. We need to find a proper replacement. Requirements: - not too ugly and some kind of responsive JS slideshow - method to hook into LDAP for auth (direct LDAP support or PAM) - direct access to the media files in the filesystem - a webapp using a daemon for background tasks and inotify support would be nice - an Android app would be nice Pyoto from Kilobug had some of these features but not all. Maybe we could work with him to improve it.

Just in case someone was thinking about Gallery 3, there was license problems IIRC, and the project is long dead:

#3 - 2017-07-16 21:33 - Marc Dequènes

- Priority changed from Normal to High

Gallery is gone, we need to move the photos elsewhere where the users have access to their data in the meanwhile.

I've been looking at two solutions:

- [fgallery](#): it's nice, would need more testing, but lacks support for subdirectories and seems to lack maintenance, so this would not work (an overview mode would have been nice too)
- [myphotoshare](#): seems not bad, but HappyPeng seem to be unable to see the media appearing, only the text around; seems nice overall even is not as sexy as the previous one (and without the captions and face detection)

I'm playing with [a test site](#) to check how it works.
