#### Description

/var/log/apache2/milkypond/stuff.milkypond.org/error.log is one year old:

```
head -n 1 /var/log/apache2/milkypond/stuff.milkypond.org/error.log
[Fri Apr 08 19:15:26.327568 2016] [:error] [pid 30828] [client 115.65.108.42:49918] PHP Fatal error: Method OC_L10N_String::__toString() must not throw an exception in /usr/share/owncloud/apps/files_external/appinfo/app.php on line 0
```

logrotate is run by cron and logrotate updates /var/lib/logrotate/status

```
grep stuff.*err /var/lib/logrotate/status
"/var/log/apache2/milkypond/stuff.milkypond.org/error.log" 2017-4-17-6:25:12
```

/etc/logrotate.d/apache2:

```
/var/log/apache2/*.log /var/log/apache2/*/*/*.log {
    weekly
    missingok
    rotate 26
    compress
    delaycompress
    notifempty
    create 640 root adm
    sharedscripts
    postrotate
        if /etc/init.d/apache2 status > /dev/null ; then \
            /etc/init.d/apache2 reload > /dev/null; \
        fi;
    endscript
    prerotate
        if [ -d /etc/logrotate.d/httpd-prerotate ]; then \
            run-parts /etc/logrotate.d/httpd-prerotate; \
        fi; \
    endscript
}
```

/etc/logrotate.d/httpd-prerotate doesn't exist.

Content of /var/lib/logrotate/status:

```

#### Subtasks:

Bug # 524: Toushirou: /var/log/proftpd/tls.log not rotated

Resolved

Bug # 525: Toushirou: /var/log/apache2/\* remove delaycompress

Resolved

#### History

##### #1 - 2017-05-09 15:00 - Pierre-Louis Bonicoli

In order to understand the problem, --verbose switch was added in /etc/cron.daily/logrotate but output of cron tasks aren't logged.

I updated the logrotate command in /etc/cron.daily/logrotate:

```
/usr/sbin/logrotate --verbose /etc/logrotate.conf &> /var/log/logrotate.log
```

We will need to check the logfile after 2017-5-14-6:25:14:

```
grep stuff.*access /var/lib/logrotate/status  
"/var/log/apache2/milkypond/stuff.milkypond.org/access.log" 2017-5-7-6:25:14
```

Consequently to some manual tests (modification of datetime in /var/lib/logrotate/status for the following entry), /var/log/apache2/milkypond/stuff.milkypond.org/error.log has been rotated.

## #2 - 2017-05-28 10:38 - Pierre-Louis Bonicoli

Here are the logs:

```
rotating log /var/log/apache2/andesi/dev.andesi.org/access.log, log->rotateCount is 26  
dateext suffix '-20170528'  
glob pattern '-[0-9][0-9][0-9][0-9][0-9][0-9][0-9][0-9]'  
compressing log with: /bin/gzip  
error: error creating output file /var/log/apache2/andesi/dev.andesi.org/access.log.1.gz: File exists  
log /var/log/apache2/andesi/dev.andesi.org/access.log.27.gz doesn't exist -- won't try to dispose of it  
rotating log /var/log/apache2/andesi/dev.andesi.org/error.log, log->rotateCount is 26
```

## #3 - 2017-05-28 10:43 - Pierre-Louis Bonicoli

Seems related to [#734688](#) which is [fixed](#) in Stretch (3.11.0-0.1).

## #4 - 2017-06-01 01:02 - Pierre-Louis Bonicoli

Discussed with Duck: all logs older than 1 year can be removed.

[Marc Dequènes](#): is the following definition of files to delete ok with you (it is ~250Mo):

```
find /var/log/ -type f -not -newermt 2016-06-01
```

## #5 - 2017-06-01 17:41 - Marc Dequènes

- Status changed from New to In Progress

I guess this issue affects all servers, so I would suggest to compute the list on all of them (and rename this BR accordingly).

This considered, based on your command I would add this list of questions/exceptions (after checking on all hosts):

- /var/log/dmesg: seems deprecated, the dmesg command do not read it anyway so I guess it's useless
- /var/log/mcelog: we should probably keep it
- /var/log/lpr.log: same, unless we decide to disable this (useless) logging in rsyslog
- /var/log/ratbox-services; these are never rotated, which is bad, but they take a negligible space so I would like to keep them (until this IRCd is replaced, see [#464](#))
- /var/log/installer: history to keep
- /var/log/memcached.log: keep (does not seem rotated)
- /var/log/tw\_mgmt.log: keep (not rotated)
- /var/log/apache2/duckcorp/myip.duckcorp.org/error.log: keep
- /var/log/fsck: keep
- /var/log/mip6d.log: keep
- /var/log/boot: keep
- /var/log/dbconfig-common: keep
- /var/log/faillog: keep

As some .log Apache files are removed, we should not forget to restart the service to be sure new files are created.

#### #6 - 2017-06-02 11:24 - Pierre-Louis Bonicoli

It seems this issue affects only Toushirou: it seems that's the repercussion of multiple bugs in logrotate. The first bug occurred when the filesystem was full.

Before cleaning:

```
/dev/mapper/main-logs      9.8G  4.6G  4.7G  50% /var/log
```

After:

```
/dev/mapper/main-logs      9.8G  4.4G  4.9G  48% /var/log
```

- Removed:
  - /var/log/dmesg
  - /var/log/ykksm.log (was empty)
  - /var/log/uucp.log (was empty)
  - /var/log/syslog.9.gz
  - /var/log/scrollkeeper.log.{1,2}

- Kept:

- /var/log/apache2/duckcorp/myip.duckcorp.org/error.log: keep
- /var/log/boot: keep
- /var/log/dbconfig-common: keep
- /var/log/faillog: keep
- /var/log/fsck: keep

- /var/log/installer: history to keep
  - /var/log/lpr.log: same, unless we decide to disable this (useless) logging in rsyslog
  - /var/log/mcelog: we should probably keep it
  - /var/log/memcached.log: keep (does not seem rotated)
  - /var/log/mip6d.log: keep
  - /var/log/ratbox-services; these are never rotated, which is bad, but they take a negligible space so I would like to keep them (until this IRCd is replaced, see [#464](#))
- Removed by mistake:
    - /var/log/tw\_mgmt.log

#### #7 - 2017-06-02 11:30 - Pierre-Louis Bonicoli

I removed this unused file too: /etc/logrotate.d/ykksm.

I need to check after Sunday if /var/log/apache2/duckcorp/www.duckcorp.org/access.log has been rotated. Currently /var/lib/logrotate/status contains "/var/log/apache2/duckcorp/www.duckcorp.org/access.log" 2017-5-28-6:25:14.

#### #8 - 2017-06-17 00:05 - Pierre-Louis Bonicoli

Nothing change, I just removed two empty files. According to #734688, they could prevent rotation of logs.

```
$ find /var/log/apache2/ -size 0 -iname "*.gz"
/var/log/apache2/andesi/dev.andesi.org/access.log.1.gz
/var/log/apache2/error.log.1.gz
```

```
$ ls -l /var/log/apache2/andesi/dev.andesi.org/access.log.1.gz /var/log/apache2/error.log.1.gz
-rw-r----- 1 root adm 0 May 24 2016 /var/log/apache2/andesi/dev.andesi.org/access.log.1.gz
-rw-r----- 1 root adm 0 May 24 2016 /var/log/apache2/error.log.1.gz
```

#### #9 - 2017-06-19 10:42 - Pierre-Louis Bonicoli

- Status changed from In Progress to Resolved

The previous deletion of empty .gz files solved this problem:

```
# extract from /var/log/logrotate.log
creating new /var/log/apache2/duckcorp/www.duckcorp.org/access.log mode = 0640 uid = 0 gid = 4
renaming /var/log/apache2/duckcorp/www.duckcorp.org/error.log to /var/log/apache2/duckcorp/www.duckcorp.org/error.log.1
```

```
# grep www.duckcorp.org.*acc /var/lib/logrotate/status
"/var/log/apache2/duckcorp/www.duckcorp.org/access.log" 2017-6-19-6:25:5
```

```
# ls -l /var/log/apache2/duckcorp/www.duckcorp.org/access.log*  
-rw-r----- 1 root adm 17373 Jun 19 10:35 /var/log/apache2/duckcorp/www.duckcorp.org/access.log  
-rw-r----- 1 root adm 60940198 Jun 19 06:24 /var/log/apache2/duckcorp/www.duckcorp.org/access.log.1
```

Debug command/switch has been removed from /etc/cron.daily/logrotate.
