Description	
We probably have several unused accounts, so let's check usage, contact users, and adapt or close account as needed.	
Sub-tasks are to track specific resources usage, which would allow for per-service cleanup and help account-level cleanup.	
It would be nice if the per-service reports could be parsable in order to generate an aggregate report for admin.	
Subtasks:

Beware for these scripts you would need ruby-net-ssh 4.1 in unstable to support ed25519 keys.
