Description

After [#607](#), I checked logs on Thorfinn and Jinta and discovered that Postfix queue wasn't empty:

```
postqueue -p
[...]
68ED2105      85288 Mon Oct 30 01:21:08  daemon@Thorfinn.duckcorp.org
(delivery temporarily suspended: connect to Thorfinn.duckcorp.org[193.200.43.26]:25: Connection re
fused)
                                     root@Thorfinn.duckcorp.org
[...]
-- 424 Kbytes in 9 Requests.
```

debsecan is executed in a cron (/etc/cron.d/debsecan), output is send to root due to MAILTO value in /etc/default/debsecan and mails are not sent:

```
Oct 31 00:00:27 Thorfinn postfix/smtp[2699]: connect to Thorfinn.duckcorp.org[193.200.43.26]:25: C
onnection refused
Oct 31 00:00:27 Thorfinn postfix/smtp[2699]: connect to Thorfinn.duckcorp.org[2001:67c:1740:9005::
26]:25: Connection refused
Oct 31 00:00:27 Thorfinn postfix/smtp[2698]: connect to Thorfinn.duckcorp.org[193.200.43.26]:25: C
onnection refused

```

There is the same configuration problem on Jinta.

On Touthirou it seems there is another problem:

```

```
