<b>Confirmed:</b>	Yes	<b>Help Needed:</b>	
<b>Branch:</b>			
<b>Description</b>			
It seems there is an apache misconfiguration:			
<ul style="list-style-type: none"><li>• /var/log/apache2/lists.duckcorp.org_ssl_error.log</li></ul>			
<pre>/var/log/apache2/lists.duckcorp.org_ssl_error.log:[Thu Mar 28 09:18:21.839134 2019] [authz_core:error] [pid 30354] [client W.X.Y.Z:41356] AH01630: client denied by server configuration: /var/www/void/dc-admins</pre>			
<pre>/var/log/apache2/lists.duckcorp.org_ssl_error.log:[Thu Mar 28 09:18:22.243678 2019] [authz_core:error] [pid 30354] [client W.X.Y.Z:41356] AH01630: client denied by server configuration: /var/www/void/favicon.ico</pre>

lists.duckcorp.org: fix web configuration

- add favicon
- add robots.txt
- check directory restrictions
- define a vhost DocumentRoot because the global restricted DocumentRoot cause access on /listinfo/<list> to emit a authz\_core:error on /<list> even if the CGI is well executed for some reason; with this config there is no 404 on /<list> so this is a weird side-effect

Moreover, these changes also avoid authz\_core:error on undefined resources (like the previously missing favicon), thus preventing from being banned by Fail2ban (closes #644).
