| I need to continue exploring LXD on Elwing. Not sure if we can use it to replace Orfeo in case we loose it or the housing but it may become handy.  |                |                        |                                     |
| Currently on major problem is the Debian packaging which is still WIP: <a href="https://wiki.debian.org/LXD">https://wiki.debian.org/LXD</a><br>My package has not been updated for a while and I would like a more stable solution if we're to use it in production. |                |                        |                                     |
