

DuckCorp Infrastructure - Bug #759

redmine instances don't send any notification

2022-03-15 22:29 - Pierre-Louis Bonicoli

Status:	In Progress	Start date:	2022-03-15
Priority:	Normal	Due date:

Target version:		Entity:	DuckCorp
Patch Available:		Security:	No
Confirmed:	Yes	Help Needed:	
Branch:			

Description

Since the redmine instances are hosted within a LXC container, email notifications are no longer sent.

It looks like the issue comes from the Redmine configuration and 127.0.0.1:25 being used within the container.

The following configuration update isn't sufficient:

```
--- /etc/redmine/dc/configuration.yml      2022-03-15 22:28:00.095274510 +0000
+++ /etc/redmine/dc/configuration.yml.new  2022-03-15 22:27:44.102827009 +0000
@@ -4,8 +4,8 @@
  email_delivery:
    delivery_method: :smtp

-   domain: ''
+   address: 10.0.7.1
+   domain: 'projects.duckcorp.org'
    enable_starttls_auto: false
    port: 25
```

due to the grey listing configuration:

```
Mar 15 23:12:37 Touthirou postfix/smtpd[1597691]: connect from unknown[10.0.7.2]
Mar 15 23:12:37 Touthirou postfix/smtpd[1597691]: 4KJ71x5crKz4Bs: client=unknown[10.0.7.2]

Mar 15 23:12:38 Touthirou postfix/cleanup[1597693]: 4KJ71x5crKz4Bs: milter-reject: END-OF-MESSAGE from unknown[10.0.7.2]: 4.7.1 Try again later; from=<issues@projects.duckcorp.org> to=<[redacted]@ir5.eu> proto=ESMTP helo=<projects.duckcorp.org>
```

[Marc Dequènes](#) should the grey listing be disabled for 10.0.7.2 or is there another way ?

dc-rspamd: whitelist redmine container IP

refs #759

History

#1 - 2022-03-16 00:54 - Marc Dequènes

We could disable it per IP I think but I've never done that so we'll need to dig into rspamd's config. Another way would be to add a local relay that would handle the retries. Or it could even send outside by itself.

#2 - 2022-03-20 04:28 - Pierre-Louis Bonicoli

- % Done changed from 0 to 50

- Security set to No

The following configuration works fine (within the controller /etc/redmine/dc/configuration.yml needs to be updated too):

```
# cat /etc/rspamd/local.d/greylist.conf
whitelisted_ip = "10.0.7.2";
# systemctl restart rspamd.service
```

Should this configuration be added to ansible? Something like that would work:

```
diff --git a/ansible/playbooks/tenants/duckcorp/web/projects.duckcorp.org.yml b/ansible/playbooks/tenants/duckcorp/web/projects.duckcorp.org.yml

Quack,

Sorry to reply late.

The configuration seems fine. This file is managed by Ansible already, see *ansible/roles/dc-rspamd/templates/local.d/greylist.conf* (although empty).

I updated the mail configuration and noticed the change being overwritten, so I adapted the rules to add the fix.

I'm not closing the ticket since the Redmine configuration also needs to be handled in Ansible (sorry no time for that right now). I assigned the ticket to you, I hope you don't mind.
